Montana's Airports Support Our State

Montana's airports play an integral role in our transportation system by providing access to destinations within the state, throughout the country, and across the globe. Airports also offer significant economic benefits to our communities by supporting jobs; generating payroll; paying taxes; and triggering spending at local, regional, and state levels.

The importance of airports goes beyond transportation and economics. Airports offer services and other attributes of value that cannot always be easily measured in dollars and cents. Residents and visitors use airports for leisure and business travel, and airports serve as the base for a wide range of critical activities such as wildland firefighting, search and rescue operations, and training for future aviators. Airports are the starting point for aircraft that conduct utility inspections, provide medical evacuation services, and transport staff and executives for business activity.

To better understand the value of Montana's airports from the perspective of both economics and community benefits, the Montana Department of Transportation (MDT) conducted a comprehensive study of the state's aviation facilities. The study analyzed the contributions of the Montana airport system, including aviation-related and non-aviation-related businesses, visitor spending, capital expenditures on construction, and additional spin-off (or "multiplier") effects. The study also examined specific activities and uses at each airport to identify how these facilities support Montana's residents and visitors.

Methodology

This study expresses the economic benefits of Montana's airports in terms of jobs, payroll, and total annual economic impact derived from the activities that occur at aviation facilities. Direct impacts include those from on-airport businesses, construction-related activities, and spending from visitors who travel through an airport. Airports host on-airport businesses that serve aircraft or passengers such as:

- Administration
- Military
- Airlines
- Maintenance
- Parking
- Concessions
- Car rental
- General aviation
- Air tours
- Air cargo

Additionally, airside and landside construction projects require continuous investments, many of which are high-dollar, long-term undertakings. Because commercial service and general aviation airports are essential to visitors' abilities to conduct business or vacation in Montana, airports support the hospitality industry through lodging, restaurant, retail, and entertainment spending.

Airports' direct impacts also have spin-off effects throughout Montana, as dollars spent at an airport and by visitors off-airport are re-spent locally, regionally, and statewide. Spin-off effects are caused when a portion of direct business revenues are used to purchase goods and services in Montana (i.e., indirect effects) and when the portion of revenues paid as wages to workers are spent within the state (i.e., induced effects).

Combined, direct impacts and spin-off effects compose the total contribution of an individual airport and determine the statewide impact of Montana's airport system.

STATEWIDE IMPACTS

Aviation is a vital key to Montana's economic activity and transportation network. The public-use airports in the state contribute:

DIRECT ECONOMIC IMPACTS

On-Airport
\$695,000

Construction
\$3,333,000

Visitor Spending
\$210,000

SPIN-OFF ECONOMIC EFFECT
\$4,238,000

CTB TOTAL IMPACTS

53
\$2,217,000
\$6,972,000

Agricultural Spraying

Corporate/Business Activity

Aerial/Wildland Firefighting

Military Exercise/Training

Emergency Medical Aviation

Police/Law Enforcement

Cut Bank International Airport

Cut Bank International Airport (CTB) is a general aviation airport three miles southwest of the City of Cut Bank, Montana. The city has a population of 3,000 people and serves as the county seat of Glacier County. Cut Bank International Airport is 25 miles south of the Canadian border along Highway 2. Located in northeastern Montana, national parks offering world-class outdoor opportunities surround the region.

Cut Bank International Airport hosts a wide range of activities and serves as an essential feature of the local community. The airport holds an annual Montana Fun Weekend and a three-day aerial acrobatics "Can Am Competition" featuring a fly-in/drive-in breakfast, car show, drag races, burn-out contest, and airplane rides. A World War II Airman's Museum is also housed at the airport. Local schools visit the airport to tour the museum and learn about aviation. Community meetings are also frequently held at airport facilities.

In addition to its important community roles, other airport activities include recreational flying, agricultural spraying, corporate aircraft operations, aerial surveying, military training, flight training, and prisoner transport. The airport's tenants, Montana Aviation Maintenance and Montana By Air, offer flight training and aerial pipeline inspections.

Cut Bank International Airport is a resource for the city and a vital component of the local economy. Administrators are currently planning to construct a new ramp in 2017 to ensure a high level of service continues to be provided to the airport's many users.
