

I'm Officer Chris Williams with the Montana Department of Transportation, Region 2, stationed in Butte, Montana.

I do probably 3 or 4 inspections a day that usually take up about 2 to 3 hours of time to do. My favorite thing about working for MDT is, it's a good job. They treat you very well. The benefits are good, it's a steady job. There is always going to be truck traffic moving through so you aren't really worried about a downturn in the economy, as officers our jobs are pretty much always going to be here. What we strive for is safety of the traveling public. Whether it be conditions of the vehicles traveling, stuff falling off of them, tires blowing – safety is our #1 goal.

Safe trucks on our highways saves lives.
