

PREFACE

The **Montana Structures Manual** has been developed to provide uniform structural design practices for Department and consultant personnel preparing contract plans for Department projects. The bridge designer should attempt to meet all criteria presented in the **Manual**. However, the **Manual** should not be considered a "standard" which must be met regardless of impacts.

The **Manual** presents much of the information normally required for a structural project; however, it is impossible to address every situation which the bridge designer will encounter. Therefore, designers must exercise good judgment on individual projects and, frequently, they must be innovative in their approach to structural design. This may require, for example, additional research into the structural design literature.

The **Montana Structures Manual** was developed by the MDT Bridge Design Section with assistance from the engineering consulting firm of Roy Jorgensen Associates, Inc. and its subcontractor SRD Engineering. The **Manual Review Committee** consisted of:

William Fullerton (Project Coordinator)	Montana Department of Transportation
Kent Barnes	Montana Department of Transportation
Dave Johnson	Montana Department of Transportation
Kevin McCray	Montana Department of Transportation
Nigel Mends	Montana Department of Transportation
Bryan Miller	Montana Department of Transportation
Bob Modrow	Montana Department of Transportation
Devin Roberts	Montana Department of Transportation
Merrill Rutherford	Montana Department of Transportation
Ken Shearin	Roy Jorgensen Associates, Inc
Craig Birkholz	Roy Jorgensen Associates, Inc.
Randall Burks	Roy Jorgensen Associates, Inc.
Dennis Mertz	University of Delaware

Table of Contents

MONTANA STRUCTURES MANUAL

<u>Section</u>		<u>Page</u>
Preface	i
Table of Contents	ii

Volume I — ADMINISTRATION AND PROCEDURES

Chapter One	MDT Organization
Chapter Two	Bridge Project Development Process
Chapter Three	Bridge Design Coordination
Chapter Four	Administrative Policies and Procedures
Chapter Five	Plan Preparation
Chapter Six	Quantity Estimates
Chapter Seven	Construction Cost Estimates
Chapter Eight	Contract Documents
Chapter Nine	Records and Files
Chapter Ten	Reserved

Volume II — STRUCTURAL DESIGN

Chapter Eleven	General	
11.1	Basic Approach	11.1(1)
11.2	Structural Design Literature	11.2(1)
11.3	General Structural Design Criteria	11.3(1)
11.4	Exceptions	11.4(1)
Chapter Twelve	State Plane Coordinate System	
12.1	Survey Datum Considerations	12.1(1)
12.2	Location and Survey	12.2(1)
12.3	The Montana State Plane Coordinate System	12.3(1)
12.4	Guidelines for Bridge Design and Plan Preparation	12.4(1)
Chapter Thirteen	Structural Systems and Dimensions	
13.1	Procedures	13.1(1)
13.2	General Evaluation Factors	13.2(1)
13.3	Superstructures	13.3(1)
13.4	Substructures and Foundations	13.4(1)
13.5	Roadway Design Elements	13.5(1)
13.6	Structure Dimensions (Design Aids)	13.6(1)
13.7	Hydraulics	13.7(1)
13.8	Environmental Issues	13.8(1)
13.9	Structure Type, Size and Location	13.9(1)

Table of Contents

(Continued)

<u>Section</u>		<u>Page</u>
Chapter Fourteen	Loads and Analysis	
14.1	General	14.1(1)
14.2	Permanent Loads	14.2(1)
14.3	Transient Loads	14.3(1)
14.4	Elastic Structural Analysis	14.4(1)
Chapter Fifteen	Bridge Decks	
15.1	Background	15.1(1)
15.2	“Strip Method”	15.2(1)
15.3	Design Details for Bridge Decks	15.3(1)
15.4	Miscellaneous Structural Items	15.4(1)
15.5	Bridge Deck Appurtenances	15.5(1)
Chapter Sixteen	Reinforced Concrete	
16.1	General	16.1(1)
16.2	Steel Reinforcement	16.2(1)
16.3	Reinforced Cast-in-Place Concrete Flat Slabs	16.3(1)
Chapter Seventeen	Prestressed Concrete Superstructures	
17.1	General	17.1(1)
17.2	Materials	17.2(1)
17.3	Bridge Details	17.3(1)
17.4	Standard Girders	17.4(1)
17.5	Girder Design	17.5(1)
17.6	Girder Details	17.6(1)
Chapter Eighteen	Structural Steel Superstructures	
18.1	General	18.1(1)
18.2	Materials	18.2(1)
18.3	Loads	18.3(1)
18.4	Fatigue Considerations	18.4(1)
18.5	General Dimension and Detail Requirements	18.5(1)
18.6	I-Sections in Flexure	18.6(1)
18.7	Connections and Splices	18.7(1)
Chapter Nineteen	Substructures and Bearings	
19.1	Abutments	19.1(1)
19.2	Intermediate Supports	19.2(1)
19.3	Bearings	19.3(1)

Table of Contents

(Continued)

<u>Section</u>		<u>Page</u>
Chapter Twenty	Foundations	
20.1	General	20.1(1)
20.2	Spread Footings and Pile Caps.....	20.2(1)
20.3	Piles.....	20.3(1)
20.4	Drilled Shafts	20.4(1)
Chapter Twenty-one	Highway Bridges Over Railroads	
21.1	Procedures	21.1(1)
21.2	Design Criteria	21.2(1)
Chapter Twenty-two	Bridge Rehabilitation	
22.1	Scope of Work.....	22.1(1)
22.2	Bridge Inspection/Bridge Management	22.2(1)
22.3	Condition Surveys and Tests.....	22.3(1)
22.4	Bridge Rehabilitation Techniques.....	22.4(1)
22.5	Bridge Widening	22.5(1)
22.6	Other Bridge Rehabilitation Project Issues	22.6(1)
22.7	Bridge Rehabilitation Literature (Other than AASHTO Documents)..	22.7(1)
Chapter Twenty-three	Miscellaneous Structures	
23.1	Walls	23.1(1)
23.2	Other Structure Types	23.2(1)
Chapter Twenty-four	Construction Operations	
24.1	General	24.1(1)
24.2	Shop Drawings	24.2(1)
24.3	Field Issues.....	24.3(1)
24.4	Standard and Supplemental Specifications	24.4(1)
Chapter Twenty-five	Computer Programs	
25.1	General	25.1(1)
25.2	MDT Programs.....	25.2(1)
25.3	External Programs	25.3(1)
