

DH RANCH

Watershed # 13-Upper Yellowstone River Basin
Carbon County, Montana

LAND OWNERSHIP: PRIVATE

BACKGROUND INFORMATION

This mitigation site was constructed during the spring of 2007 in the eastern portion of the Upper Yellowstone River Basin watershed (Watershed #13). It was anticipated that this site would compensate for wetland impacts resulting from MDT highway and bridge reconstruction projects in the watershed. The DH Ranch mitigation site was constructed on private property protected by an MDT wetland conservation easement. The goal of the project was to create wetland hydrology at the site, and thereby ultimately provide up to 17 acres of aquatic habitat.

WETLAND INHABITANTS

AMPHIBIAN	
Northern leopard Frog (<i>Rana pipiens</i>) Woodhouse's toad (<i>Bufo woodhousii</i>)
