

2015 Montana

Airport Directory 54th Edition!

MDT Aeronautics Division

www.mdt.mt.gov/aviation

54 Years of Montana Airport Directories

January 1, 2015

For the last 54 years, our agency has been proud to present to you, the flying public, the annual Montana Airport Directory. As our cover illustrates, Montana is a spectacular place to live and for those of us that choose to, flying in this State is second to none.

The cover photograph was taken September 13, 2014 at the state-owned Seeley Lake Airport during the 50th anniversary of the airport and the 75th anniversary of the Montana Pilots Association. As the photograph depicts the weather was a beautiful fall day. Hamburgers, brats, chips, cake and beverages were provided and served by the local senior citizens as a donation fund raiser that reaped exceptional results. Sixty plus airplanes showed up to be on static display for more than 200 attendees.

Most importantly as you look at the photograph you see two children standing in the parking lot waving at a departing aircraft. The future of aviation rests in our youth's hands with tutoring from all of us. The MDT Aeronautics Division has a host of educational programs: ACE Academy; Aviation Art Contest; Aviation Career Days and others offered to promote aviation. Montana aviation alphabet groups and several individual donors provide a generous amount of scholarships to assist students and others in their quest of pursuing an aviation career. Please be a mentor when given the opportunity.

The economic impact to the community provided by these small general aviation airports is generally underestimated. To assist with that education, the MDT Aeronautics Division is in the early stages of updating its 2007 economic impact study.

From all of us at the MDT Aeronautics Division we wish you the best of what Montana has to offer, safe flying and clear skies!

Debbie Alke
Administrator

**State of Montana
Airport Directory**

Steve Bullock, Governor
Mike Tooley, Montana Department of Transportation Director

This airport directory has been compiled from information submitted by airport owners, flight operators, interested pilots, and inspections by the FAA and the Aeronautics Division. Every effort has been made to provide a complete and accurate directory. Because airport conditions are constantly changing, the Montana Aeronautics Division assumes no responsibility for any action taken by a pilot on the basis of information contained herein.

Pilots are reminded it is their responsibility to check FAA Notices to Airmen for current information, the Airport Facility Directory, as well as making a visual inspection of the airport before using.

Fifty Fourth edition revised to December 2014.

Table of Contents

A-1	Introduction
A-2	Personnel
A-3	Table of Contents
A-4	FSS Numbers and Flight Plan Format
A-5	NTSB Notification Rules
A-7	Density Altitude and Fuel Chart
A-8	Zulu Time, Light Gun, Morse and Phonetic Alphabet
A-9	Standard Traffic Pattern and Pirep Format
A-10	MT Navigational Aids
A-11	Commercial Broadcast Stations
A-12	Airport Weather Reporting Numbers and Frequencies
A-13	US Customs Services Available
A-15	Mountain Flying Tips
A-17	Survival Tips

FAA Flight Service Station

FSS Toll Free Number.....1-800-WX-BRIEF(1-800-992-7433)

When you call from anywhere in the state, you will be connected to the Prescott, AZ. F.S.S.

Format for Filing a Flight Plan

1. Type of flight plan (IFR or VFR)
2. Aircraft identification
3. Aircraft type and equipment
4. True Airspeed
5. Point of departure
6. Departure Time (Z)
7. Initial cruising altitude
8. Route of flight
9. Destination
10. Estimated time en route
11. Remarks
12. Fuel on board
13. Alternate airports
14. Pilot's name, address, telephone #, home base
15. Number persons aboard
16. Color of aircraft
17. Destination and contact

Rules Pertaining to Aircraft Accidents, Incidents, Overdue Aircraft and Safety Investigations

(National Transportation Safety Board Procedural Regulations, 49 CFR 830 (in part))

1. Immediate Notification

The operator of an aircraft shall immediately, and by the most expeditious means available, notify the nearest offices of the National Transportation Safety Board, Bureau of Aviation Safety Field Office when:

- A. An aircraft accident or any of the following listed incidents occur:
 - 1. Flight control system malfunction or failure
 - 2. Inability of any required flight crew member to perform his normal flight duties as a result of injury or illness
 - 3. Turbine engine rotor failures excluding compressor blades and turbine buckets
 - 4. In-Flight fire
 - 5. Aircraft collide in flight
- B. An aircraft is overdue and believed to have been involved in an accident.

2. Manner of Notification

The most expeditious method of notification to the National Transportation Safety Board (NTSB) by the operator will be determined by the circumstances existing at the time. The NTSB has advised that any of the following would be considered examples of the type of notification that would be acceptable:

- A. Direct telephone notification
- B. Telepathic notification
- C. Notification to the FAA, who would in turn notify the NTSB by direct communication

3. Reports

The operator shall file a report on NTSB form 6120.1 or 6120.2 available for the NTSB field offices, or the NTSB, Washington D.C., 20594. The report shall be filed:

- A. Within ten (10) days after an occurrence for which notification is required as per section 1. A & B (above)
- B. When, after seven (7) days, an overdue aircraft is still missing
- C. Upon request of an authorized representative of the NTSB
 - 1. Each crew member, if physically able at the time the report is submitted, shall attach thereto a statement setting forth the facts, conditions and circumstances relating to the accident or occurrence as they appear to him to the best of his knowledge and belief. If the crew member is incapacitated, he or she shall submit the statement as soon as he or she is physically able.

Applicable Phone Numbers

FSS.....1-800-WX-BRIEF(1-800-992-7433)

CST.....6	PST.....8

Light Gun Signal Procedures For ATC

Color and type of Signal	On the Ground	In Flight
Steady Green	Cleared for take-off	Cleared for landing
Flashing Green	Cleared for taxi	Return for landing (to be followed by steady green at proper time)
Steady Red	Stop	Give way to other aircraft and continue circling
Flashing Red	Taxi clear of landing area (runway in use)	Airport unsafe – do not land
Flashing White	Return to starting point on airport	(No meaning)
Alternating Red and Green	Use extreme caution	Use extreme caution

Morse Code and Phonetic Alphabet

Standard Left Traffic Pattern

For Landings

- Enter pattern in level flight, abeam the midpoint of the runway, at pattern altitude.
- Maintain pattern altitude until abeam approach end of the landing runway, on downwind leg.
- Complete turn to final at least $\frac{1}{4}$ mile from runway.

For Take-Offs

- Continue straight ahead until beyond departure end of runway.
- If remaining in the traffic pattern, commence turn to crosswind leg beyond the departure end of the runway, within 300' below the traffic pattern.
- If departing the traffic pattern, continue straight out or exit with a 45° left turn beyond the departure end of the runway after reaching pattern altitude.

Format for Issuing a Pilot Report

Custom Services Available at Listed Airports

Butte, Bert Mooney

LRA

Un-staffed location, serviced from Helena. Two hours advance notice and permission to land is required, and strictly enforced. Available Monday through Friday 0800-1700, closed Saturday, Sunday and Holidays. Call 406-495-2195 to arrange for CBP services.

Bozeman, Bozeman Yellowstone International Airport

LRA

US Customs User Fee Facility – Ph# 406-388-2144 Hrs of operation Thursday – Monday, 9 AM to 5 PM Appointments available 24/7 on case by case basis with officer availability and addition \$225 user fee. User fees based on aircraft gross weight.

Cut Bank, Cut Bank

AOE

Un-staffed location, serviced from Sweetgrass. Two hours advanced notice is required and strictly enforced. Available “on-call” 7 days a week. Call 406-335-9610 to arrange for CBP services.

Del Bonita, Whetstone International Airport

LRA LB

Unpaved landing strip, serviced from nearby Del Bonita Port of Entry. One hour advance notice and permission to land is required. Available “on call” 7 days a week; but may be unavailable due to local conditions. Call 406-336-2130 to arrange for CBP services and determine conditions. NOTE: runway straddles the international border, taxi to U.S. side and park for CBP clearance.

Great Falls, Great Falls International

AOE

Full service CBP location. One hour advance notice is required. Available 7 days, normal business hours 0800-1600, after hours by firm appointment. Call 406-453-0861 to arrange for CBP services.

Helena, Helena Regional

LRA

Limited service CBP location. Two hours advance notice and permission to land is required. Available Monday through Friday 0900-1700, closed Saturday, Sunday and Holidays. Call 406-449-5506 to arrange for CBP services.

Kalispell, Glacier Park International

LRA

Full service CBP location. One hour advance notice and permission to land is required. Available Monday through Friday 0900-1700, normally closed Saturday, Sunday and holidays, but after hours may be available by firm appointment. Call 406-257-7034 to arrange for CBP services.

East Poplar, Scobey Port of Entry

LRA LB

Unpaved landing strip, serviced from nearby Scobey Port of Entry. One hour advance and permission is required. Available “on-call” 7 days a week; but may be unavailable due to local conditions, Call 406-783-5375 to arrange for CBP services and determine conditions.

Sweetgrass, Ross International

LRA LB

Unpaved landing strip, serviced from nearby Sweetgrass Port of Entry. One hour advance notice and permission to land is required. Available “on call” 7 days a week; but may be unavailable due to local conditions. Call 406-335-9610 to arrange for CBP services and determine conditions.

IMPORTANT CHANGES:

Customs and Border Protection now requires pilots or their designees to transmit electronically via the Electronic Advance Passenger Information System (eAPIS) no later the following information for private aircraft flights arriving from or departing to a foreign place:

- Traveler manifest information for each individual traveling on board the aircraft;
- Notice of arrival information, and/or;
- Notice of departure information.

The data must be received by CBP no later than 60 minutes prior to departure of the aircraft.

Pilots must file a Flight Plan with FAA for international travel, and may continue to place "ADCUS" (Advise Customs) in their remarks. However, ADCUS no longer meets CBP's advance notice requirements and may not substitute for filing eAPIS and making arrangements with the intended airport of arrival.

Pilots still must call CBP at the intended airport of arrival to be sure that a CBP Officer will be available at the requested arrival time, to make arrangements for afterhours service, and to obtain permission to land (when applicable). Not all CBP airports of entry are staffed, and officers may respond from another location to meet arrivals; CBP must receive sufficient advance notice to enable officers to respond in time to meet the aircraft.

The CBP form 178 is obsolete and is no longer used, and faxed transmissions are no longer acceptable.

The eAPIS website is available at <https://eapis.cbp.dhs.gov> and will provide private pilots with all the tools necessary to comply with the rule. Private pilots or their designees may enroll in eAPIS immediately and establish an account. Account number and passwords should be received within five business days of the enrollment request. For complete information on how to use eAPIS there is an online tutorial available at <http://apps.cbp.gov/eAPIS-pa/>.

AOE: Refers to a designated airport of entry.

LRA: Refers to a Landing Rights Airport, where you must obtain advance permission from CBP to land.

LB: Refers to a Land Border Airport, which is usually a small airstrip associated with a Port of Entry. The runways at these locations are usually unimproved turf or gravel and may harbor hazardous or unusual conditions. Normally they are not lighted and should be used during daylight hours only. Pilots should be familiar with local conditions before attempting to use these locations; often they are available strictly on a seasonal basis because of snow or mud.

CANPASS: Refers to Canadian automated arrival system and they can be reached by calling CANPASS (1-888-226-7277). The U.S. equivalent, called GATE was discontinued after 9/11.

NEED HELP? Call CBP at Great Falls International Airport, 406-453-0861. Also look for the Guide for Private Flyers on CBP web site under the TRAVEL tab:

http://cbp.gov/xp/cgov/toolbox/publications/travel/pleasure_boats/private_flyers/

REPORT AIR SMUGGLING! Call CBP's Air Marine Operations Center to report suspicious aircraft at 1-866-AIRBUST (1-866-247-2878).

Mountain Flying Tips

General items

- Make sure that your proficiency level and your aircraft meet the special demands of your planned flight.
- If you are not sure of your capabilities, take some dual instruction from a flight instructor experienced in mountain flying.
- Keep your aircraft as light as possible.
- Be familiar with your planned route of flight and destination airport. Check the field conditions with FSS or experienced local pilots. Familiarize yourself in advance with the field length, elevation, and any special approach/departure procedures.
- Obtain a thorough weather briefing. A forecast of marginal VFR frequently translates to IFR in the mountains.
- Plan your trip for early morning or evening hours. Turbulence and density altitude are usually greatest from 10:00 am to 6:00pm.
- Stay out of the mountains if the forecast winds aloft exceed 30 knots at mountain top levels. The wind velocity can double in vicinity of mountain passes and canyons. Never fly up a blind or narrow canyon.
- Mountain winds follow contours much like a stream. The air on the lee (downwind) side of a mountain may be extremely turbulent. Fly on the upwind side of a canyon whenever possible.
- Cross-check your instruments and attitude indicator frequently. Visual horizons in the mountains may be illusory.
- Maintain your airspeed in downdrafts; don't panic. Be able to turn to lower terrain at all times.
- Approach ridges at a 45-degree angle. If caught in a downdraft, you must be able to turn away toward lower terrain.
- Be courteous to those on the ground who are enjoying a wilderness experience. Maintain sufficient altitude - 2,000 AGL is suggested over wilderness area.
- Plan your trip over valleys as much as possible.
- Carry a good survival kit and familiarize yourself with its use.

Landings

- Transmit in the blind on 122.9 MHz at non-Unicom airstrips and announce your intentions.
- A good check out and personal knowledge of conditions existing at "non-standard" airports/airstrips is essential to a safe operation. Some mountainous airstrips are, or should be, considered "one way". Although normally we are taught to land uphill, there are a number of airstrips where downhill/downstream landings are safer. A go-around must always be considered. Wet grass reduces braking action and most mountain airstrips are short.
- Control your rate of descent with power. Maintain a stable airspeed (generally the short field approach speed listed in your aircraft operations manual).
- Before beginning your approach, circle your intended destinations to ensure that the field is clear of other aircraft, livestock, wildlife, etc.
- Abort your approach if the air becomes too turbulent on your let down. Avoid low altitude maneuvering. Be alert for animals on the runway.

Take-Off

- ***Check density altitude!*** (If take-off performance for your aircraft is questionable, wait until evening or early morning when the air is cool.)
- Remember that tall grass or soft field conditions can add considerably to your take-off distance.
- Choose a go, no-go point on the runway. If not airborne at that point, abort the take-off and wait for better conditions.
- Take-off downstream (downhill) whenever possible. Avoid taking off toward rising terrain.

Survival

Immediately after an emergency landing, exit the aircraft if at all possible. Check for injuries. Give only temporary first-aid and carefully remove those with serious injuries.

Stay away from the aircraft, if possible, until engines have cooled and spilled gasoline has evaporated.

After occupants are all out and a safe distance from the aircraft, reevaluate injuries and administer first-aid as necessary. If the weather is adverse, make or find temporary shelter. Evaluate your location dangers: fire, sliding, rockslides, avalanche, terrain, weather.

Stay near the aircraft if at all possible. It contains the basic ingredients for warmth, shelter and signaling materials.

Turn on or make sure that your ELT, Personal Emergency Locator, Spot Tracker or Spider tracks is activated. Call out on your Sat Phone or handheld radio if applicable.

Signal for help. Do not neglect your aircraft radio. It's possible it may still be operational. Turn on squelch and volume and key the mike. If the results are positive, listen on local or ATC frequency. When you hear a transmission, transmit "MAYDAY-MAYDAY". If you should hear a jet, transmit on 121.5. All airlines and military aircraft monitor 121.5. If you do not hear any transmissions go ahead and transmit in the blind on this frequency. Limit your transmissions to about one every 15 minutes. Transmitting places considerably more drain on the battery than receiving. If both your ELT and radio are working, you will hear the ELT signal when listening on 121.5. It may be necessary to turn the ELT off when transmitting or listening on 121.5. (Don't forget to turn the ELT back on!)

If the weather is cold or wet you don't spend too much time trying to signal. Your prime effort must be directed toward conserving the energy you have.

The wings, rudder, etc., all may be used to make a shelter. Keep this shelter as small as possible to lessen the area your body must heat. Insulate shelters with boughs, bark, tarps, maps, etc. Use anything to keep rain from getting inside your shelter. Body heat loss is energy loss.

Your aircraft can fulfill most of your basic needs if you improvise. Think basic needs: shelter (cover), warmth (fabric), tools (metal). Maps, newspaper, engine cover, plastic tarps all make excellent emergency bedding.

Build a fire, if possible. Don't forget that the aircraft gasoline is a valuable resource in starting a fire when only wet wood is available. Caution must be used when using gasoline. Soak or pour gasoline on wood but be sure container is out of reach when igniting the wood.

Survival Continued

Paper such as charts can also aid in getting a fire started. However, do not burn your charts for firewood. Paper makes an excellent insulation for bedding, clothing and shelter. Note: Pre-plan building a fire. Have an adequate amount of wood gathered to keep the fire going for a length of time prior to lighting.

In cold weather, insulation and upholstery from the aircraft makes excellent material for overshoes, sleeping bags, mittens, hats, and ground insulation. Sew them together with salvaged aircraft wire. Put plastic side out for better wetness protection.

If running water is not readily available, melt snow or ice in improvised pot, or squeegee dewdrops from aircraft surfaces. Place a sheet of plastic flat on the ground so that it may collect dew or condensation. If it is raining, place a plastic sheet in a ground depression to collect water.

Keep a signal fire burning, all the times if possible. Smoke and firelight can be seen from great distances. Both air and ground searchers will be looking for them.

Aircraft should be made **visible from the air**, if possible. Clear brush, cut trees, etc. Be prepared to make signals as aircraft approach your area. Keep the mirror handy if the sun is shining. Practice its use.

Get your emergency signaling devices ready and have signal equipment handy. Every possible effort must be made to attract searchers to your location by signals and to sustain life and energy until assistance arrives.

Colored panels can tell a message. Pile brush in SOS. Stamp large, two-foot-wide letters SOS in the snow. Fill stamped marks with boughs or small brush.

Clear windows make a fair emergency mirror. **Signals make you effectively bigger. Survival will depend greatly upon your state of mind. Psychological discipline is a must. You must sustain life until rescued. Remain calm! Think!**

Example Survival Kit

Compass	Knife
Tool Kit (small, lightweight)	50' 1/8" nylon rope
First-Aid kit	Garbage sacks
Food (freeze dried, candy bars, etc)	Fish hooks, sinkers and line
Disposable space blankets	Can opener, sierra cup
Lightweight folding saw	waterproof fire starter
Waterproof matches and lighter	Sterno fuel and candle
Signaling devices or flares	pad and pencil
Mirror, small flashlight	Parka and sleeping bag
Gun and ammo	Canteen with water

How to Obtain Permission to Use a U.S. Forest Service Permit Only Airstrip (Restricted Public Use)

There are a significant number of airstrips owned by the U.S. Forest Service that are restricted public use airports. These airports are usually unimproved, backcountry turf strips. In order to use one of these airstrips, you need to obtain a USFS Special Use Permit Application (form FS 2720-3). These are available at any USFS office. Once the form is completed, it needs to be sent to the appropriate district ranger. The district ranger then approves or denies the request. The decision is not subject to appeal. Examples of restricted airstrips that are owned by the USFS are the Wurtz and Saunderson airstrips located on the North Fork of the Flathead river. For further information, contact the USFS at 406-758-5260.

Seaport Regulation Information

Federal Regulations

U.S. Army Corps of Engineers

Seattle District -206-764-3742

Libby Dam (Lake Koochanusa) OPEN, 24-hr. mooring, 500' from occupied public sites, 500' from dam

Omaha District - 402-995-2082

Fort Peck OPEN, obtain map of restricted areas from corps. (Ask for latest edition, some new restrictions have been charted).

U.S. Forest Service

Beaverhead National Forest-406-683-3900

Closed to Seaplanes.

Bitterroot National Forest-406-363-7100

No seaplane restrictions.

Lake Como No seaplane restrictions.

Painted Rock Lake No seaplane restrictions.

Custer National Forest-406-657-6200

No bodies of water within the boundaries of this Forest that could support seaplane operations. Cedar River and Grand River Grasslands cannot support seaplane operations

Deerlodge National Forest-406-496-3900

Delmore Lake CLOSED to motor craft greater than 25-hp

Homestake Lake CLOSED to all motorized craft

Lowland Lake Closed to all gasoline motors

All waters in the Anaconda Pintlar Wilderness Areas closed to motorized use.

Flathead National Forest-406-758-5208

Lakes in Bob Marshall, Great Bear and Mission Mountains Wildernesses and the Jewel Basin Hiking Area closed to motorized vehicles and equipment, as are segments of the Flathead River System that have been designated Wild and Scenic.

The following bodies of water are OPEN:

Hungry Horse Res. Lindberg Lake Holland Lake

Tally Lake Bitterroot Lake

Gallatin National Forest-406-587-6701

No seaplane restrictions.

Helena National Forest-406-499-5201

No seaplane restrictions.

Kootenai National Forest - 406-293-6211

Lakes and reservoirs within the Kootenai National Forest Boundary are generally open to seaplane landings with the exception of Cabinet Mountain Wilderness.

Lewis and Clark National Forest-406-791-7700

Crystal Lake CLOSED to internal combustion engines

Forest Lake CLOSED to internal combustion engines

Lolo National Forest-406-329-3750

Most bodies of water in the forest are too small to land seaplanes.

State and Local Regulations

Aeronautics Division, Department of Transportation

Helena-406-444-2506; FAX 406-444-2519

No state seaplane regulations. Contact Tim Conway for more info.

Many water bodies in the state have restrictions on motorized vessels or require that no-wake operation speeds be maintained at all times. In these areas seaplane operations would not be allowed. Contact the local Montana Fish, Wildlife and Parks office for information regarding specific operational restrictions on Montana lakes.

Seaplane Landing Areas

(Many areas are private use facilities)
(Prior notice is recommended)

Chester Lake Elwel 19 mi. SW of city. Telephone: 800-869-8422. Transportation: Courtesy Car. Food: Available. Fuel: Auto fuel by fuel truck from Tiber Marina, NE shore of lake. Notes: Additional phone: 406-759-5200. Showers & RV hookups available. Frontier Aviation, Joe Fenger, 406-759-5431.

Dillon Beaverhead Marina & Park SPB Location: Clark Canyon Reservoir, 20 Mi. S of city. Telephone: 406-683-5556. Hours Attended: Daily. Mooring Facilities: Docking. Food: Buffalo Lodge 683-5535.

Ft. Benton Lohse Air Spray Location: Missouri River. Telephone: 406-622-3323. Fuel: Need can to haul 100LL fuel from airport. Notes: Land on Missouri River E of bridges, dock at city park dock and ramp. Call airport for transportation and fuel. Not updated.

Jordan Hell's Creek Marina SPB. Location: Ft. Peck Lake, 25 mi. N of city. Telephone: 406-557-2345. Hours Attended: 7am-9pm. Mooring facilities: Docking; Ramp. Food: Available on site. Lodging: Available on site. Camping: Available on site. Notes: Emergency use only.

Libby Kooconusa Lake Resort & Marina Telephone: 406-293-7548. Food: Café. Lodging: Cabins. Camping: Available. Fuel: Auto at dock; 100LL available from Libby Airport. Credit Cards Accepted: Yes. Notes: Sheltered cove on very long lake. Not updated.

Miles City Yellowstone River Fuel: Call 123.0 or 406-232-1021 (Falcon Aviation) For delivery. Notes: Rocky, approach with care, very shallow. Be prepared to carry gas in cans. Not recommended if you want to preserve floats. Not updated.

Polson (8S1) Lake Aero SPB Location: Flathead River, .5mi. SW of city. Coordinates: NO47°-42.7'; W114°-11.1'. Waypoint: 8S1 112.8. Telephone: 406-883-2482 & 406-883-5299. Hours attended: 8:00am to 6pm. Elevation: 2925'. Pattern altitude: 4000'. Landing lanes: 18-36-500'x 300' Obstructions: Rocks on E. shoreline. Mooring facilities: Dock, Windsock, Beaching; Pullout. Frequencies: Unicom 122.8. Sectional: Great Falls. Transportation: Rental cars and taxi. Food: Qua-Tuk-Nuk; Lake City Bakery; McDonald's; El Rancho; China Gate. Lodging: Super 8, 883-6251; Qua-Tuk-Nuk, 800882-6263; Port Polson, 883-5385 within 1-2 miles. Camping: available on field. Local attractions: Flathead Lake; Glacier National Park; National Bison Range; Big Mountain Ski Resort within 75 mi. Services: Repairs; Flight instruction; Automobile & aircraft rental. Fuel: (delivered on call) Jet A; 100LL. Credit Cards accepted: All types.

(Cont'd)

Seeley Lake (M35) Lindey's Landing West SPB Location: Seeley Lake, 1 mi. NW of city. Coordinates: NO47°-10.5'; W113°-28.8'. Telephone: 406-677-9229. Hours attended: Daylight, June-Sept; Unattended, Oct-May. Elevation: 3,993'. Landing Lanes: 12-30; 14,000x1,000. Mooring Facilities: Docking. Frequencies: Unicom 122.9. Sectional: Great Falls.

Somers Flathead Lake Telephone: 406-257-7678. Transportation: Rental car. Fuel: 100LL. Owner will bring fuel to marina. Notes: Not updated.

Whitefish Stillwater Landing SPB Location: Lower Stillwater Lake, 12 mi. NW of city. Coordinates: NO 48°-52.2'; W114°-34.5'. Waypoint: FCA 108.4 303 □ 25 mi. Telephone: 406-881-2553. Hours Attended: Seasonal. Elevation: 2,780'. Pattern Altitude: 3,800'. Mooring Facilities: Beaching; Docking. Sectional: Great Falls. Food: Grouse Mountain Lodge 10 mi. 862-3000; Comfort Inn 12 mi. Camping: on site: Local Attractions: Big Mountain Ski Area 12 mi.; Glacier National Park 35 mi.

Wolf Point Missouri River Fuel: Available via truck from French Aviation, 406-653-1740. Notes: Located 3 mi. s of airport. Dock is 1/4 mi. W of bridge. Two power lines W of the bridge, swift current, water level fluctuates. Not updated.

Seaplane Pilots

The Aeronautics Division receives numerous inquires regarding seaplane operation and availability information, for further Seaplane pilots association representatives call:

Bob Kimball (406) 745-0906
