# Montana's Airports Support Our State

Montana's airports play an integral role in our transportation system by providing access to destinations within the state, throughout the country, and across the globe. Airports also offer significant economic benefits to our communities by supporting jobs; generating payroll; paying taxes; and triggering spending at local, regional, and state levels.

The importance of airports goes beyond transportation and economics. Airports offer services and other attributes of value that cannot always be easily measured in dollars and cents. Residents and visitors use airports for leisure and business travel, and airports serve as the base for a wide range of critical activities such as wildland firefighting, search and rescue operations, and training for future aviators. Airports are the starting point for aircraft that conduct utility inspections, provide medical evacuation services, and transport staff and executives for business activity.

To better understand the value of Montana's airports from the perspective of both economics and community benefits, the Montana Department of Transportation (MDT) conducted a comprehensive study of the state's aviation facilities. The study analyzed the contributions of the Montana airport system, including aviation-related and non-aviation-related businesses, visitor spending, capital expenditures on construction, and additional spin-off (or "multiplier") effects. The study also examined specific activities and uses at each airport to identify how these facilities support Montana's residents and visitors.

## Methodology

This study expresses the economic benefits of Montana's airports in terms of jobs, payroll, and total annual economic impact derived from the activities that occur at aviation facilities. Direct impacts include those from on-airport businesses, construction-related activities, and spending from visitors who travel through an airport. Airports host on-airport businesses that serve aircraft or passengers such as:

- Administration
- Military
- Airlines
- Maintenance
- Parking
- Concessions
- Car rental
- General aviation
- Air tours
- Air cargo

Additionally, airside and landside construction projects require continuous investments, many of which are high-dollar, long-term undertakings. Because commercial service and general aviation airports are essential to visitors' abilities to conduct business or vacation in Montana, airports support the hospitality industry through lodging, restaurant, retail, and entertainment spending.

Airports' direct impacts also have spin-off effects throughout Montana, as dollars spent at an airport and by visitors off-airport are re-spent locally, regionally, and statewide. Spin-off effects are caused when a portion of direct business revenues are used to purchase goods and services in Montana (i.e., indirect effects) and when the portion of revenues paid as wages to workers are spent within the state (i.e., induced effects).

*Combined, direct impacts and spin-off effects compose the total contribution of an individual airport and determine the statewide impact of Montana's airport system.*

## STATEWIDE IMPACTS

Aviation is a vital key to Montana's economic activity and transportation network. The public-use airports in the state contribute:

# Havre City-County Airport

## DIRECT ECONOMIC IMPACTS

**On-Airport**  
**\$1,667,000**

**Construction**  
**\$1,133,000**

**Visitor Spending**  
**\$1,269,000**

Corporate/  
Business Activity

Emergency  
Medical Aviation

Havre City-County Airport (HVR) is four miles west of the Town of Havre, 31 miles south of the Canadian Border in Hill County, Montana. The airport is just minutes from U.S. Highways 2 and 87, providing easy access to the surrounding area. The airport is in a rural region reliant on the agricultural industry.

Havre City-County Airport is a commercial Essential Air Service airport. Commercial airlines such as Cape Air provide direct flights to Billings. Medical flights utilize Havre City-County Airport to fly doctors and nurses to the town every two to three weeks. Government aircrafts are housed at the airport.

Tenants include MRKT Aviation Fuels, LLC, and Hutchinson Aviation, a maintenance and flight training company. The airport is home to a flying club, recreational flying and parachuting activities, aerial inspections, flight training, and emergency medical aviation services. The airport also serves a staging area for community events.

Havre City-County Airport is a key gateway to this relatively remote region and an important element of the community's infrastructure.

**SPIN-OFF ECONOMIC EFFECT**  
**\$4,069,000**

## HVR TOTAL IMPACTS

**59**

**\$1,962,000**

**\$6,668,000**
