

Operation

Passenger Side Use DEPLOYMENT:

- At the truck cab location, set the truck parking brake.
- At the truck cab location, turn the ignition switch, unit power, and intercom ON.
- Select and engage the hydraulic power source, (Truck PTO or Auxiliary Engine).
- Engage engine 2 speed to run truck engine at high idle.
- At Turret-1 location, adjust the intercom volume.
- At Turret-1 location, Plus-1 Operator Interface press OK, then select the AXLE LOCK COUNTERWEIGHT mode (1).
- At Counterweight screen select AXLE LOCKS ON (5)
- Depress the Footswitch and hold the ACTIVATE AXLE LOCKS AND COUNTERWEIGHT FOR RIGHT SIDE OPERATION” (1) button until the axle locks and sliding counterweight are deployed.
- At Plus-1 Monitor: On COUNTERWEIGHT Screen Select UNIT ON (5)
- MAIN MENU – select button #2, for CONTROL SYSTEM screen.
- At CONTROL SYSTEM screen press GROUND CONTROL button #1.
- Turn on the ground controller as noted on page 20.
- At Turret-1 location, engage foot pedal and operate Boom-4 down.
- Remove the boom tie down device and lower the platform rests.
- At Turret-1 location, select “X” to return to the MAIN MENU screen. Select button 3, PLATFORM LEVELING, then MANUAL, and then PLATFORM UN-STOW until platform is level.
- Select AUTOMATIC.
- Select “X” to return to the MAIN MENU screen.
- At the Plus – 1 MAIN MENU select Button # 2 for CONTROL SYSTEMS, turn the Ground Controller Off and the Platform Controller ON.
- Turn on the intercom system in the cab and adjust the volume.
- Board the platform.
- Ensure Platform Radio controller is ON and press the radio green enable button.
- Operate Boom-4 Up so the platform is higher than the bottom of boom three, approximately 45 degrees above Boom-3 for visibility.
- Operate Boom-1 Up and Boom Leveling IN until the booms are about 12” inches above the rests.
- Operate Turret-2 CW to rotate Boom-2 and Boom-3 out to the side a few feet away from the cab of the truck.
- Operate Boom-1 1 to adjust the height of the boom assemblies to clear any obstructions.
- Adjust Boom Leveling as needed.
- Operate Turret-2 CW and Turret-1 CCW until Boom-1 is positioned 90 degrees to the bridge and Boom-2 and Boom-3 are parallel to the bridge.
- Boom-1 telescope can be used at any time.
- Operate Boom-2 and Boom-3 open until Boom-2 is vertical and Boom-3 is horizontal. Boom-3 and Boom-4 control may now be operated to provide clearance. The platform will automatically level as Boom-2, Boom-3 or Boom-4 are moved.
- Operate Turret-2 CW to rotate the platform under the bridge.
- The booms may now be rotated and Boom-4 extended as necessary to reach the desired location.
- Boom-3 and Boom-4 may be used to raise or lower the platform as desired.

Operation

Passenger Side Stowing:

- Retract Boom-3 and Boom-4 extensions.
- Operate Turret-2 CCW until Boom-2 and Boom-3 are parallel to the bridge.
- Operate Boom-2 and Boom-3 controls to **completely close both booms.**
- Operate Boom-4 to adjust for proper clearance.
- Operate Boom-1 to adjust for proper clearance. Adjust Boom Leveling as needed.
- Operate Turret-2 CCW and Turret-1 CW until the boom assembly is directly over the boom rests.
- Operate Boom-1 Down, and operate Boom Leveling Out to place the booms in their rests. Booms should be placed in their rests simultaneously.
- Adjust Boom-4 to provide safe exiting of the platform.
- Exit platform.
- At Turret-1 location, select X to return to the MAIN MENU screen.
- Select PLATFORM LEVELING, then MANUAL, and then PLATFORM STOW until platform is stowed.
- At Turret-1 location, Raise Boom-4 until boom stops.
