JOB DESCRIPTION

Montana state government is an equal opportunity employer. The State shall, upon request, provide reasonable accommodation for otherwise qualified individuals with disabilities.

Job Title: Software Developer Supervisor **Position Number:** 81015, 81024, 81102

Location: Helena **Department:** Transportation

Division and Bureau: Information Services Division, Software and Data Bureau

Section and Unit:

Job Overview:

Directs and manages a team of software engineers, GIS professionals, web developers, database administrators, data architecture and data analytics staff. Responsible for the oversight and implementation of software solutions, web development, GIS architecture and infrastructure, as well as data analytics and data architecture. This position reports directly to the Software and Data Bureau Chief, serves as an integral member of the ISD Management Team, and supervises up to ten staff (10.0 FTE).

Essential Functions (Major Duties or Responsibilities):

Strategy, Planning, and Implementation - 70%

- Ensure all systems follow state and federal requirements and laws. Establish and manage, in conjunction with the Software and Information Management Bureau Chief, the team's vision, mission, goals, objectives, and priorities.
- Establish goals, priorities, and objectives for MDT computer systems as part of a comprehensive strategic plan for the section. Assess and apply new technologies for the department business plan; design and maintain systems to meet user requirements, maintain compatibility and integration, and forecast future system, application, web, GIS, and data needs.
- Assist manager with developing MDT computer-oriented policies and procedures affecting software development, web, GIS, and data architecture and analytics.
- Responsible for reviewing and providing guidance on all agency Information Technology Procurement Requests.
- Plan and direct staff responsible for managing, maintaining, and monitoring production environments. Balance work assignments among various staff to ensure adequate and effective

use of agency resources. Coordinate major application support activities, database and GIS operations, and data architecture and analytic efforts.

- Responsible for planning, procuring, and management of new software, software development tools, web solutions and tools, GIS solutions, and data analytical tools.
- Monitor customer satisfaction with services provided by the section. Maintain contact with customers to assess needs. Anticipate changes in customer's business processes and assist in assessing future service needs.
- Responsible for ensuring daily backups, disaster recovery processes and procedures, and all application and web solutions are efficient to meet business needs 24 hours a day, 7 days a week.
- Assist with planning and allocating the section budget by determining priorities, completing historical analysis, producing target spend items and estimating future growth.
- Implement automated workflows, tools, and solutions where possible to gain efficiencies and meet customer expectations.

Staff Supervision - 25%

- Supervises up to 10.0 FTE information technology individuals and supervises any contracted staff who perform work in this section.
- Assist staff with technical assistance and guidance, provide new ideas and direction, and institutionalize proactive section leadership.
- Establish and monitor office work plans, priorities, procedures, and progress through regularly scheduled meetings and consultations.
Develop overall organizational responsibilities, structures, and staffing responsibilities.
- Identify staffing needs, assist with recruiting, and hiring employees. This involves ensuring compliance with state and federal employment and civil rights laws throughout the hiring process, assigning personnel screening and selection committees, reviewing results, and making final determinations for hiring, and ensuring proper training and orientation of new employees.
- Determines training needs of subordinate staff through analysis of program effectiveness; new standards, specifications, technologies, and policies; and staff performance. Prepares, presents, or coordinates training through personnel specialists, training offices, or outside consultants.
- Establishes objective, measurable performance standards for subordinate staff, evaluates the performance of positions directly supervised, and completes performance evaluations. Recommends, implements, and monitors corrective actions including discipline and termination. Enforces disciplinary policies to ensure consistency in the application of disciplinary actions.

Other Duties - 5%

Performs any additional duties identified by the Supervisor in support of the Department mission and objectives. Participates in on-going training and educational opportunities as applicable.

Supervision

The number of employees supervised is: Up to 10 each

The position number for each supervised employee is: 20002, 20003, 20005, 20011, 20040, 22052, 23002, 23005, 25014, 25027, 81009, 81011, 81013, 81014, 81016, 81017, 81018, 81023, 81027, 81028,

81029, 81100, 81101, 81117, 81118, 81119, 81120

Physical and Environmental Demands:

This position functions in a typical office environment.

Knowledge, Skills, and Abilities (Behaviors):

- Extensive knowledge of software development, web development, GIS, database, and data architecture and analytics; industry best practices and innovative technologies; and workforce management.
- Proven ability in program management and planning/organizing the work of other staff.
- Proficient in contract, vendor, and procurement management.
- Excellent communication and negotiation skills.
- Proven ability to manage complex Information Technology projects.
- Excellent leadership ability to lead and motivate staff within an industry of constant innovation and change.

Other Skills and Abilities

The required skills and abilities for this position include strong interpersonal and communication skills, leadership, ethics and integrity, active listening, analytical and problem-solving abilities, critical thinking, creativity, deductive and inductive reasoning, relationship building, accountability, reading comprehension, and time management.

Minimum Qualifications (Education and Experience):

The required knowledge and skills are typically acquired through a combination of education and experience equivalent to a bachelor's degree in information technology management, business management, computer science or information systems.

This position requires a minimum of 2 years of experience managing a combination of software and web developers, GIS professionals, database administrators, and data architecture/analytics staff. In addition, 4 years of work experience in these areas is required. This position must have extensive knowledge with Java, ServiceNow, Agile Development, ESRI and GIS solutions; Oracle, SLQ Server and Mongo database environments; data warehouse solutions like Snowflake; web development tools and solutions, and disaster recovery.
