Memorandum

To: Lesly Tribelhorn, Highways Engineer
From: Dave Johnson, Bridge Design Engineer
Date: 10-27-2016
Subject: Project Plans – Table of Contents

Bridge Plans are identified with a sheet number beginning with a B prefix. In the past we would superimpose a B prefix sheet number on the Bridge Standard Drawings and As-Built drawings for each bridge plans package. A bridge plans package may have 19 design plans, 3 standard and 2 As-Built drawings. The plans would then be labeled sheets B1- 24.

We have stopped superimposing a bridge sheet number on the Bridge Standard Drawings and on As-Built drawings. This has created confusion for those in contract plans and the print shop that assemble the Bid Package. We (road design) typically haven't listed the AS-Built or Standard Drawing sheets separately in the table of contents.

Part of Contract Plans and the print shop's Quality Control is to count the total number of sheets in the package. To ease the confusion show the B1- Bxx followed by the number of Standard sheets and As-Built sheets provided from Bridge Bureau as shown below.
