Effective:	October 23, 2017
Revised:	
Subject:	**Reference attachments and Live Nesting**
Objective:	**MDT CAD users: Reminder**

This is a reminder that we do not support nested references in **DMS**, **Docuplot** or **Network Batch Plotting**. Nested references are not supported and therefore should not be used. We request users fix any files that are using nested references? Please let us know if you have questions or need clarification

Thank you
