Subject: I-15 MM 364 North Bound Detour

On 10/7/2021 at 4:00pm, MCS learned of an emergency detour being placed on north bound I-15 MM 364 near Shelby. The detour was put in place due to the failure of a stock pass culvert. MDT is working on creating a cross over that will allow traffic to remain on the interstate with a 12-foot width restriction and a staging area for loads exceeding 12-foot wide. There may be a maximum width, length and weight restriction placed on the crossover, but it is unknown at this time. MCS will provide further information as it becomes available.

All 32J (Super Load) permittees routed through this location must contact the main permit office during business hours for permit route amendments. Any other loads traveling through the area wishing to amend their route may do so through the main permit office during regular business hours or any open weigh station during non-business hours.

You can reach the MCS Permit Office at (406)444-7262, Monday through Friday from 7:30am until 5:00pm. We apologize for the inconvenience and thank you for your patience.

Weigh Station phone number can be found at the following link;
