

Data and Information Work Group

The Data and Information (D&I) work group is comprised of appointed representatives from MDT, FWP, and MSWP with expertise in data production and management, research and analysis, and geographic information systems.

The D & I work group assembles data and supporting information to define and identify areas of greatest need based on wildlife-vehicle conflict and important areas for wildlife movement and conservation. They support the development of collective priorities and seek ways to address challenges with data collection, management, use, and information sharing.

Data and Information Work Group Members

MDT Representatives

- ❖ Brian Andersen, Geospatial Supervisor
- ❖ Gabe Priebe, Traffic & Safety Bureau Chief
- ❖ Paul Sturm, Great Falls District Biologist

FWP Representatives

- ❖ Justin Gude, Research and Technical Services Section Chief
- ❖ Adam Messer, GIS/Database Analyst
