

BIG MOUNTAIN ROAD

The Montana Department of Transportation (MDT) and its partner Knife River are scheduled to begin construction in early June, weather and other unforeseen factors permitting. Work is expected to continue through the 2024 construction season, ending in the fall. The project area is located between the intersections with Smith Drive and Glades Drive. Planned work includes pavement overlay activities and additional digouts to prepare sections of the road that need further repairs. The overlay will be followed by replacing guardrail, a seal and cover (chip seal), a fog seal, new striping, and upgraded signage.
