

Project Improvements

The Stillwater River – North Pavement Preservation project on US Highway 93 (US 93) in Flathead County extends approximately 2 miles north of the intersection with West Reserve Drive. Planned work includes milling the existing surface, applying a new overlay and a seal and cover (chip seal), new pavement markings, bridge repair work, and upgraded signage.

Why is this work necessary?

Projects like this one preserve the roadway for the future. The purpose of this project is to enhance safety features, extend the service life of the roadway, and reduce maintenance costs.
