Purpose of Meeting: Update and confirm workplan opportunities

The emphasis area strategies were approved at the July 15, 2020 meeting.

The attendees discussed strategy opportunities to be included in workplan and provided a description of program or project opportunity noting whether the effort was an annual, ongoing, or had a specific time for completion. Each opportunity includes a lead(s) to provide updates to the chair, lists the alignment of a specific safety plan if appropriate, includes reference of best practices and proven countermeasures, and either an outcome or an output as a measure of success.

The workplan matrices will be a reference for regular reporting and will be used to update the annual workplan for the next five years of the 2020 CHSP.

Participants worked through the matrices and provided input on opportunities. The chair and CHSP coordinator followed up on a few opportunities with program experts for inclusion in matrix. Final input due by end of Monday, September 14.

The final workplan will be included in the 2020 CHSP and posted to the CHSP site at a future date.
